See what you can grow

Why VegTrug?

There's little that can compare to the satisfaction you get when you are able to pick and eat your very own produce.

"Variety is the spice of life"...the famous words of William Cowper back in 1785. For the majority of us, routine is what makes our day structured and organized, which is great...but it's not that fun. Why not expand your palate and designate a small area of your space to a VegTrug. Raised off the ground to eliminate back pain, these planters offer a 'V' shape which reduce soil waste for shallow rooted crops but allows deep middle space for crops which require more depth.

There is a real sense of achievement when you grow your own produce. It's hard to describe the feeling, so why don't you experience it for yourself with a VegTrug now!

- Sourced from sustainable plantation grown fir, your VegTrug will last for many years.
- Flat packed in one box, easy to build.
- Each VegTrug comes with a purpose built, fitted membrane liner (also available as a replacement item)
- Easy working height. No more bending or kneeling. Ideal with the elderly and wheelchair users.
- Can be easily netted or covered with VegTrugs' line of accessories.
